Ämne: SV: Invitation to speak at Voi's COP26 events on Net Zero Transport

Dear Sarah,
Apologizes for the late feedback. The events seem very interesting and I have emailed my colleague and she will answer, if she has not already done so, your request shortly. Thank you very much for hearing from you. Do not hesitate to contact you if you have more questions.

Best regards
Jennie

Ämne: Invitation to speak at Voi's COP26 events on Net Zero Transport

Dear Jennie and Anna,

My colleague, Tina Ghasemi, kindly shared your contact details and may have given you a heads up this invitation was coming. We are gearing up for a historic COP26 in Glasgow.

As a Swedish company, leading innovation for Net Zero urban transport, we would be honored to have you speak at one of our COP events in Glasgow. We are hosting two events, which aim to outline the future of cross-sectoral collaboration for safe, sustainable and inclusive Net Zero transport in towns and cities. The events are the following:

Our exclusive senior level Networking Dinner - November 5th

Hosted by Voi's CEO and guest City Mayor (we are talking to Anna König Jermyr).

7:00 pm - 11:00 pm

The Ivy, The Morgan Room

Should you not be able to attend on Friday, we would be more than happy for you to join and speak at our second event:

Lunch panel and workshop - November 9th

'How can we decarbonise urban transport in a safe and equitable way?'

The event will feature keynote speeches by a guest Mayor and an interactive roundtable discussion followed by a product demo and networking.

11:45 - 1:45 pm

The Corinthian Club

Press attending

Please let us know if either of these are possible for you. More information on the speakers and participants will follow shortly. If you are planning events or campaigns around the COP conference, we would be happy to hear how we can be of service in supporting your efforts.

We hope to see you there.

About Voi. Stockholm-born Voi is Europe's largest micromobility provider, operating in 70 cities across 11 countries, and has been certified Net Zero since January 2020. In our three years Voi's users have completed 60 million rides, replacing 11 million car journeys.

Best,

Sarah Badoux
