Ämne: Joint business position supporting the DMA

Ladies and Gentlemen,

I attach for your information a joint position from a group of European and international companies supporting the proposed Digital Markets Act (DMA).

These companies face serious challenges to compete on the merits due to unfair practices of large gatekeepers. They strongly support the EU's efforts to introduce ex-ante regulation of such platforms and welcome the proposed DMA as an essential step towards restoring fairness, innovation and competition on the merits to the EU market.

We are at your disposal should you have any questions or require additional information.

Best regards,

Thomas Tindemans
